

### HELP FOR INJURED WILDLIFE

Some months ago RACV screened advertisements advising motorists of their 24-hour contact number for wildlife emergencies. This seems such a practical and effective way RACV can help wildlife shelters and motorists in these unwelcome events, which are likely to become far more frequent as drought conditions worsen. However, RoyalAuto makes no mention of this service and I am amazed at the number of motorists arriving at my shelter who've not heard of it. Injured and orphaned animals need all the help they can. *Lyn Faulk, Derrinallum*

Anyone encountering injured wildlife on our roads can call RACV's emergency roadside assistance number – 13 11 11 – which operates 24 hours a day, and RACV will pass on the details to the relevant wildlife rescue service. – *Jeremy Bourke*
