BOWLAND MATHS

Saving a baby kangaroo

Getting Started

This case study comprises two interactive "browsers" – one for teachers, the other for pupils - containing all the instructions, lesson plans, resources and supplementary materials necessary to run the case study.

Double-click on **Start** for an overview and index page.

Each pupil will need a hard copy of the record booklet to complete and hand in – this can be accessed from the teacher or pupil browsers or opened directly from:

> ***content_teacher/Booklet.pdf***

To enable pupils to access the browser, the file ***Start_pupils.htm*** and the folder ***content_pupils*** should be copied to each machine or placed in a shared area on your network.

Hardware & software requirements

The case study can be browsed using Internet Explorer, Mozilla Firefox or any web browser which supports "frames" and should be "cross-platform".

The video clips require Windows Media Player or other video media player that can play .wmv files. Users of non-Windows machines may require extra software for this (such as VLC from http://www.videolan.org/vlc/)

For PC users, *Adobe Reader* (or similar) is required to view the guides and handouts. *Adobe Reader* is available to download for free from:
http://www.adobe.com/
