Getting started

This case study consists of an introductory video, a teacher's guide, lesson plans, "Analyst" (pupil) guide and a collection of supporting documents.

Double-click on **Start** for a summary and index page.

Hardware & software requirements

Required Hardware:

The case materials are cross platform. Required is a computer that can play an mp4 file for viewing by the entire class. This requires:

- Sound output
- Speakers
- LCD projector or TV screen that can project the computer screen

Optional Hardware:

- A computer that can display an mp4 file to a small group (require soundcard, speakers, and appropriate software)
- A computer that allows students to use Microsoft Excel, Word, and PowerPoint.

Software:

- QuickTime is needed to play the video: see <http://www.apple.com/quicktime/>
- Microsoft Office™, specifically Powerpoint, Excel and Word, or alternative (such as OpenOffice):

OpenOffice is available from <http://www.openoffice.org>.

Free viewers for [MS PowerPoint](#) and [MS Excel](#) and other MS Office file types are available from <http://office.microsoft.com/downloads>

- PC users will require Adobe Reader (available from www.adobe.com) to view and print PDF files.
