My music

Getting Started

This case study consists of a single document comprising a teacher guide and worksheet masters, some sample music files and some free audio editing software.

Double-click on *Start* for an overview and index page.

The data files and documents can be opened directly from the *content* folder. The sample music tracks are in the folder **content/starterTRACKS.**

Three versions of installation software are available for teachers who want to use the optional **Audacity** application: one for Windows, one for Intel Macs and one for PowerPC Macs. These can be found in the **content/Audacity** folder School users may require the assistance of a school ICT administrator to access these files.

If you need help using **Audacity**, you can view help files included within the application itself. To do this, click *Help* on the top menu bar then click *Contents*.

Hardware & software requirements

Software is available for PC and Mac; a loudspeaker is required and pupils will need headphones and the means to play music CDs and/or mp3 music files. Some short 'starter tracks' are available as mp3 files.

The documents and data files are supplied in both Microsoft Office (.doc, ,.xls) and OpenDocument (.odt, .ods) formats – the latter can be used with free office software such as OpenOffice.org (see http://www.openoffice.org)

For PC users, *Adobe Reader* (or similar) may also be used to view the print materials. *Adobe Reader* is available to download for free from:
http://www.adobe.com/

NB: The **Audacity** application is distributed under the terms of the GNU Public license: source code can be found in the file audacity-src-1.2.6.zip.
