

Reducing road accidents

Getting Started

This case study comprises a teacher's guide, a set of student handouts to print and a browser-based application (only needed for some of the lessons).

Double-click on **Start** for an overview and index page.

PC Users: If you have just downloaded the complete case study from the website and opened the resulting "zip" file then you will need to extract the contents to your hard disc before they will work correctly: Right click on the .zip file and choose 'Extract all'.

If you wish to access files directly:

The complete teacher's guide is in: ***content/Accidents teacher guide.pdf***

The worksheets for copying are in: ***content/Accidents handouts.pdf***

The software installers are in the folder ***content/installers***

Hardware & software requirements

Session 1 does not require computers.

Sessions 2, 3 and (optionally) 4 require pupils to the supplied application – which can be run from the ***content/software/*** folder of this download or online at:

bowlandmaths.org.uk/materials/projects/online/reducing_road_accidents

Additional information

Sessions 3 and 4 require students to produce a poster/presentation – we recommend that large sheets of paper, felt pens, glue sticks etc. are available. Optionally, this can be done electronically using regular word processing or presentation software.

Version 28/11/2008 – Software revised 2019
